Optical parameters

The vario optics of the CSvideo allows a smooth focusing of the optics to the desired distance.

The following tables show examples of measurement distances and the corresponding measurement spot sizes:

The sensors are available in two versions:
Standard focus (SF): 200 mm till infinity
Close focus (CF): 90 mm till 250 mm

Alternatively you can use the [optris Spot size calculator](#) or the [optris calculator app](#).
